TIMBERWOLF[®]

ECO-FRIENDLY FENCING[™]

ECO-Conscious Texas Homeowner Association Installs TimberWolf Perimeter Fencing

Shertz, TX - When Carolina Crossings North Homeowner Association decided it was time to replace their 13 year old, 2400 linear foot, cedar perimeter fence, President Matt Hulbert was first and foremost concern was a material that would not "break the bank" in these trying economic times. Says Matt "We considered (another) cedar or pressure treated pickets (briefly)... we had been down that road before and knew that the maintenance cost were through the roof and that we would be looking at replacing it about in another 10-12 years". Matt even looked at natural stone concrete solutions but was atonished by the prohibitive costs involved, "... it came in at 300% more than the [cost of] Timberwolf".

In December 2008, after an exhaustive search, Matt proposed to the board members that TimberWolf fencing offered them the best solution to their fencing dilemma and they agreed. "Timberwolf offered us the best support starting at our initial discovery stage and ending at the fence installation". Lower maintenance cost (about \$3,000 annually) and consistency of the product insured a very natural look over our 2400lf project. The Board selected Dog Eared Coastal Cedar.

Once installed, "...of 328 homes in our community, the only objection that surfaced was the choice of color (1 house out of 328...that's about as close to 100% satisfaction as you can get)" says Matt. "I cannot think or any other product, system, or material that would have been that widely accepted. There is a ton of flexibility in the product line offering a solution to nearly every situation".

THE FACTS...OUR COMMITMENT TO ENVIRONMENTALLY RESPONSIBLE LIVING

Three Cycle[™]

FiberTechs' unique manufacturing process combines recycled fiber and HDPE plastic to make our eco-friendly family of landscaping products.

Eco-Friendly

All wood-fiber raw material used in our products is reclaimed from recyclers waste that would otherwise go to landfills.

Sustainable

No trees are harvested in the manufacture of FiberTech products. Our products are ISO 14021 certified by Scientific Certification Systems (SCS), to have a minimum of 90% post-consumer recycled content.

EPA Recognized

FiberTech Products are recognized by the EPA as an ally in the fight to preserve the earth's precious natural resources. The GreenScapes program provides cost-efficient and environmentally friendly solutions for landscaping.

TIMBERWOLF®

ECO-FRIENDLY FENCING™

ECO-Conscious Texas Homeowner Association Installs TimberWolf Perimeter Fencing

The FiberTech Advantage™

FiberTech Polymers, LLC, proprietary raw material and manufacturing process converts landfill bound wood-fiber and recycled plastic into durable, aesthetically pleasing building products. These products retain the natural look and feel of real wood but require little to no maintenance.

TimberWolf® fencing has the look and feel of real wood. It offers significant durability advantages over wood, vinyl and other composites at comparable or lower cost. The fiber reinforced composition of TimberWolf® fencing ensures installation and workability is accomplished with ease.

Project Details

Project Location:	Shertz, TX, USA
Contractor/Builder:	Quality Fence and Welding
Date Installed:	2/10/09 to 3/10/09
Linear Feet:	2,400
Color:	Coastal Cedar
Style:	Classic Picket w/Postmaster Wood
What material was replaced?	Wood

ECO Information

½ Gallon Cardboard Milk Containers Recycled:	264,809
½ Gallon Plastic Milk Containers Recycled:	173,688
Total Recycle Number for this Project:	438,497

The TimberWolf Advantage

TimberWolf fencing is a **highly durable** product able to withstand years of weathering and abuse, providing privacy while not losing its "just installed yesterday" look.

TimberWolf fencing is **virtually maintenance-free** never requiring painting or staining

Since TimberWolf fencing is mainly composed of processed cellulose fiber it has the **look and feel of real wood**. The heavily textured wood grain enhances the appearance and the availability of 5 different natural wood-tones will compliment any landscape design.

Using post-consumer recycled materials TimberWolf is "**The Best Choice for Green Living**". Every six feet of installed TimberWolf Fencing recycles 1,120 half-gallon milk jugs (plastic) and cartons (fiber).
